PRODUCT DESCRIPTION

ARclad® IS-8026 is a silicone transfer film adhesive between two polyester film release liners designed for use in very high temperature and very low temperature applications with excellent long term stability.

FEATURES

- High performance silicone adhesive
- Polyester release liner

BENEFITS

- Outstanding high/low temperature performance
- Tear resistant liner
- Excellent die cutting characteristics

PRODUCT APPLICATIONS

Suggested for flexible circuits, gaskets and heaters where a thin bond line is required. Users should test the product to ensure it meets the specific needs of their application(s). Adhesives Research can tailor the product to meet the needs of specific applications as requested by customers.

**STORAGE AND SHELF LIFE**

One year from date of manufacture, preferably stored at 55°F (13°C) or below, 50% R.H. Product stored at room temperature for a long period of time may run a risk of liner confusion.

**SERVICE TEMPERATURE RANGES**

Recommended Minimum Application Temperature: 50°F (10°C)
Maximum Operating Temperature: 500°F (260°C)
Minimum Operating Temperature: -100°F (-73°C)

(Revised – 03/30/12)

**APPLICATION AND STORAGE OF PRESSURE-SENSITIVE ADHESIVE TAPES**

Pressure-sensitive adhesive tapes function as a mechanical product; however, the adhesive itself is a chemical composition that can be sensitive to environmental conditions. A purchaser of pressure-sensitive adhesive products should be aware of the shell life of each product and not purchase more than it can use before the expiration date. Shipping and storage conditions affect shelf life. The optimum storage temperature is 70°F (21°C). Cool, dry storage is recommended.

**For best results...**

1) The surfaces you wish to bond should be clean and free of oil, moisture and dust. If the surface temperature is below 40°F, it may be difficult to achieve a proper bond.
2) Do not use a pressure-sensitive adhesive product where it will be exposed to temperatures lower or higher than those designated for each product. Heat can destroy the effectiveness of the bond and extreme cold can cause the adhesive to harden and not adhere properly.
3) When the tape is applied, use firm hand or lamination pressure to achieve contact between the adhesive and the surface to which it is applied. Hand rollers or nip rollers may be needed for certain products or applications.

Consult your Adhesives Research sales representative if you need additional information.

**WARRANTY AND DISCLAIMER**

AR expressly warrants to Purchaser that its product, under normal and intended use, maintenance and storage, is free from defects in workmanship for twelve (12) months from the date of shipment, unless otherwise stated. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES. AR MAKES NO WARRANTY AS TO EXPERIMENTAL AND DEVELOPMENTAL SAMPLES OR MATERIALS. AR MAKES NO WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. AR accepts no responsibility for determining whether AR’s product is fit for a particular purpose and suitable for Purchaser’s method of application. AR retains the right to modify or change its products if in AR’s judgment it is advisable.

Purchaser’s exclusive remedy and AR’s sole obligation for any breach of warranty is limited to, at AR’s option, either: 1) replacement of AR’s product, or 2) reimbursement of the purchase price of AR’s product.

AR DISCLAIMS ANY OTHER OBLIGATION OR LIABILITIES ARISING OUT OF BREACH OF WARRANTY. AR will not be liable for any loss, damage, expense or consequential, incidental or special damages of any kind.
